

TOPPS UPDATE

April 2008

Anderson Mulholland & Associates, Inc. and Thermal Remediation Services, Inc. have successfully completed the first cleanup utilizing ERH (electrical resistance heating) technology in New Jersey. After only 7 months of remediation the NJDEP PCE impact to groundwater soil criteria has been achieved in all confirmatory soil borings and source area groundwater concentrations have been reduced dramatically.

Anderson Mulholland & Associates, Inc. will submit an Interim Remedial Measure Completion Report to the NJDEP for review and approval.

If you have any questions please call Ellen Ivens of Anderson Mulholland & Associates, Inc. at 914 251 0400 ext 311.
